

Meet Jamison Brekke!

NESC Technology Specialist

***Joined the NESC in 2012**

Background info:

- AAS in Computer Service & Networking
- Certificate in Cisco Networking

What intrigued you about working for the NESC?

I enjoy working in the school atmosphere. I love the technology field and working here has allowed me the opportunity to use and maintain the equipment we offer. I didn't know too much about the organization before I joined, and my time here has been very enjoyable.

What is your focus of work at the NESC?

I focus on staying in contact and building good relationships with all the teachers in our consortium, as well as making sure all equipment is maintained and performing properly. I also rotate the equipment from school to school throughout the year so every school has an opportunity to use our high-tech equipment.

What is a passion project of yours?

I like to stay on top of the new technology and opportunities for our schools. Every year we typically purchase new or upgraded equipment for the schools to use, and this is exciting to introduce the new technology to the teachers. I am also always looking for new ways to make our equipment more user-friendly for our teachers and students.

What about the NESC brings you the greatest pride?

I feel great pride when I go to the schools and talk to the teachers about how they used our equipment in the classroom and how they implemented it into their lesson plans or projects.
